1	SCM Integrations (Procurement, Inventory, OM)	Theory
2	OTBI Reporting	Theory + Hands-on

8. Implementation & Go-Live

Task No	Task Name	Delivery Type
1	Data Migration using FBDI	Theory
2	Security Roles & Access	Theory + Hands-on
3	UAT & Go-Live Strategy	Theory

Additional Notes for Learners

Course Highlights

This Oracle Fusion Supply Chain Management training is designed to provide a **deep-dive, hands-on understanding** of Supply Chain Management.

- ✓ Covers complete Procure-to-Pay (P2P) and Order-to-Cash (O2C) cycles
 - ✓ Real-time implementation scenarios (not just navigation)
 - ✓ Strong focus on integration across modules
 - ✓ Industry-aligned best practices & configurations
-

NEW & NEXT-GEN FEATURES COVERAGE

DEEP-DIVE LEARNING APPROACH

- ✓ Configuration logic + dependencies explained
- ✓ Real-time project challenges & solutions
- ✓ Cross-module impact (Inventory, Procurement, OM, Costing)
- ✓ End-to-end traceability across SCM processes

HANDS-ON & REAL PROJECT FOCUS

- ✓ Industry-based scenarios
- ✓ Practical exercises for every module
- ✓ Implementation-level understanding
- ✓ Exposure to real Oracle Cloud project workflows

WHO SHOULD ATTEND?

- ✓ Oracle Fusion SCM Consultants
- ✓ Supply Chain & Procurement Professionals
- ✓ Implementation & Support Teams
- ✓ Certification Aspirants
- ✓ EBS to Fusion Transition Candidates

OUTCOME FOR LEARNERS

- ✓ Configure end-to-end SCM modules
- ✓ Execute real-world business flows confidently
- ✓ Participate in implementation & UAT
- ✓ Apply Oracle best practices in projects
